

PIER 70 Portfolio

The PIER 70 Portfolio is allocated between two asset classes, equity and fixed interest securities, using tracker funds. The value of investments in this portfolio is split 70% equity and 30% fixed interest. The equity in this portfolio aims to track global stock markets with some additional weighting to the UK; equities are likely to have higher volatilities and hence contribute more to portfolio risk compared to the fixed interest allocation. The fixed interest aims to mirror an appropriate global mandate for a sterling investor, utilising UK government gilts, global sovereign bonds and corporate bonds to moderate the equity returns, helping to underpin values in poor markets.

Investors should be aware that the value of their investments and the income from them can fall as well as rise and investors may not receive back the full amount they invest. Past performance is not a reliable indicator of future results.
